

Looking for

Agronomist/Data entry manager

You know it is time for new challenges in your career? You want to learn a lot and use your farming knowledge in a fast growing-company?

We are a dashing and innovative startup! Looking for creative talents who would be a part of our great team. We are a small but rapidly growing team creating for farmers the precision farming tools for easier farm management and bigger profit from farm works.

FARMIS is a Lithuanian agri-tech leader creating precision farming decisions, providing farmers with scalable solutions to produce more with less. We are leading farmers to more efficient management, transforms big data into timely and accurate insights to support informed decision making. Currently, we take 70% of Lithuanian precision farming tools market and developing in Europe and such countries like Brazil.

Under the FARMIS name, there are more precision farming tools, including Agrobases. And this time we are looking for an Agronomist/Data entry manager for Agrobases development.

What you will do:

As an Agronomist/Data entry manager, your responsibilities will be to manage all of the Agrobases processes. This includes constant information updates about weeds, pests and etc. Information adoption to the global markets, constant communication with the app users and our end users - farmers.

Basic Requirements:

- fluency in written and spoken English;
- fluency in managing Excel and Data research;
- agronomy skills;
- task management and analytical skills.

Preferred Qualifications:

- excellent communication and collaborative skills;
- enjoy working in both individual and team settings;
- passion for data analysis.

This role will broadly influence the company's products, operational effectiveness and elevate the role of data as an asset to the business. We are looking for a candidate with a passion for precision farming and impact, who has agronomy knowledge and strong communication and teamwork skills.

For further interaction, contact us!

Reach us at **info@farmis.lt** and let's talk more about this opportunity!

Agrobase is one of the most popular apps among Lithuanian farmers and agronomists. It includes agronomic knowledge database with pests, weeds and diseases catalog and all registered pesticides, insecticides, herbicides in a chosen country. Currently, there are more than 100k downloads and the number of users is constantly increasing.
