

Master degree programme

Website

Business Logistics

The aim of the study program is to provide the students with a Master degree in business. Having completed the studies, the students will be able to apply the results of fundamental and applied research creatively, by making innovative decisions on the improvement and development of business logistics and implementing them in the context of intensively changing business environment.

Graduates of the Business Logistics Program will be able to create their own businesses and work as heads of logistics departments, which are required to manage business logistics processes, which cover both the movement of material assets and related information flows.
